DETAILED ACTION

Allowable Subject Matter

1. Claims 1-13 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Independent claim 1 is directed to a method of retransmitting a speech packet. The method first receives at a speech transmitting device a negative acknowledgement from a receiving communication device. The negative acknowledgement is indicative of a corrupted first speech packet transmission. Next, the method retrieves a first speech packet associated with the first negative acknowledgement. Then, the method compresses the first speech packet to form a replacement speech packet and encodes a current segment of speech responsive to the first negative acknowledgement to form a current speech packet. Next, the method combines the current speech packet and replacement speech packet to form a combined speech packet. The prior art of record, Manjunath teaches a method for operating a speech transmission device receiving an indication of a corrupted speech packet and compressing the first speech packet to form a replacement packet. Col. 13, lines 52-67, teach that an encoder in the transmitting device encodes the current frame pitch lag value and the delta pitch lag value. A second encoder encodes the delta pitch lag value, but does not necessarily encode the pitch lag value. These parameters are then used by the decoder at the receiving device during frame erasure processing to reconstruct the erased frame (see col. 14, line 17- col. 15, line 9). There simply is no teaching

in Manjunath of Applicants' claim 1 limitation of "receiving at a speech transmitting device a first negative acknowledgement from a receiving communication device indicative of a corrupted first speech packet transmission." Because Manjunath's frame erasure compensation method involves reconstructing a lost packet based on parameters transmitted by the transmitting device, Manjunath also does not teach "retrieving a first speech packet associated with the first negative acknowledgement; compressing the first speech packet to form a replacement speech packet; encoding a current segment of speech responsive to the first negative acknowledgement to form a current speech packet; combining the current speech packet with the replacement speech packet to form a combined speech packet; and transmitting the combined speech packet."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
